

**Capacity**

500 lbs. (one person)

**Electrical requirements**

110 VAC grounded circuit

**Maximum travel**

20 feet

**Speed**

20 feet per minute

**Incline limits**

30 to 45 degrees

**Brake**

Self-locking worm gear

**Drive system**

3/16" dia. aircraft cable

**Motor**

1/2 HP 90 VAC Reversible

UL and CUL listed components

Due to overall size of lift, a minimum 36" wide staircase is recommended.

Summit Lifts designs all lifts to meet the stringent requirements of ASME A17.1, and ASME A18.1 when installed properly. Those wishing to acquire these products need to check with local authorities to assure local code compliance, installation requirements, and to determine if permits are required.
